Online Course Information Form

Course Number: EE1003

Course Title: Introduction to Basic Electricity

Course Description: This course provides an introduction to electricity, electrical parts, electrical wiring, and electrical safety.

Instructor: Steve Candler

Instructor Bio: Steve Candler is an Electronics, Physics, and Physical Sciences instructor. He holds an MEd from Southern Arkansas University, a BS from University of Arkansas at Monticello, and an AS from Colorado Technical College

Prerequisite: none

Textbook Title: Practical Electricity by Rosenberg

Learning Outcomes: The student will become familiar with electrical safety, and terms and concepts associated with electricity.

Teaching Methodology, including description of interaction between student and instructor: The course is delivered entirely online, except for references to the above textbook.

Methods of Testing: Entirely online, multiple choice and true/false questions and problems

Special Attendance Requirements (student contact with instructor, proctored examinations, etc.): The student is expected to maintain weekly contact with the instructor. The Final Exam must be taken at an approved proctored location.

Other Considerations (writing ability, assignments/projects, time considerations, etc.): The student should expect each Unit to take about two weeks in order to complete the course in the allotted time.
