Why choose SAU Tech for your student?

Two-year colleges, like SAU Tech, serve almost half of all students entering college in the United States. Two-year and community colleges provide technical and transfer degrees and a smaller learning environment for the student. As the cost of higher education continues to rise, two-year colleges are becoming the smarter choice for many students.

SAU Tech provides the first two-years of college, which transfers to any four-year college in Arkansas, and technical programs for students who want to begin a career within two years. The college has apartment style housing, campus security on duty 24-7, wireless Internet, free laundry facilities, and clubs and activities to engage your student. Tutoring and personal counseling services are provided along with a mentoring program designed to help your student be successful. SAU Tech can provide a quality education in a small personal environment. SAU Tech just might be the right choice for **YOUR** student!

(Graphic Design, Web Design and Video and Film)
- Nursing
- Office Systems Technology
(Office Management and Medical Transcription)
- Teacher Education

Hannah Bailey

“SAU Tech has been a blessing in my life throughout the past two years. I am so grateful for the environment at SAU Tech. All of the teachers are so kind and willing to help any student. The teachers genuinely care about every student, they help them to succeed. SAU Tech has helped me in choosing to obtain my bachelor’s degree from SAU Magnolia. My time at SAU Tech has also given me the chance to receive a transfer scholarship provided to only select students from SAU Tech.

My experience with SAU Tech has been nothing short of a blessing and I would without a doubt recommend this college to anyone who has a desire to further their education.”

Hannah Bailey, Bearden

“When I first began my senior year I thought I would go to a big four year university, but when the time came it was what would give me the best opportunity and scholarship. SAU Tech offered me a scholarship through their concurrent program. At SAU Tech I have had a great two years and have learned a lot of great things. The teachers also helped me and would even stay after class or meet with me at another time. Starting at SAU Tech also helped me with a transfer scholarship to SAU Magnolia.”

Tyler Morrison, Harmony Grove

Porsche Jefferson

“My experience at SAU Tech has been the best I’ve ever had. I have enjoyed the campus life, my coursework, and all the new friends I’ve made. When I first started college, I knew that going to a two-year college prior to attending a university would help me be more successful. After two years of attending, Tech has prepared me for a lot more. I joined organizations, like the Student Leadership Program, Phi Beta Lambda, and Phi Theta Kappa, that promotes leadership and raises awareness throughout the school. Through these organizations I learned skills that I will always carry throughout my life. Tech also has the greatest teachers I’ve ever known. With the small classes, the teachers were always very caring and willing to do everything necessary to help the students. In addition, Tech has tutoring, so I always had someone to turn to when I needed extra help. Most of all, my experience at Tech helped me gradually transform from a high school student into a successful college student.”
