Obtain college credit through SAU Tech's Prior Learning option!

Did you know that you can obtain college credit for learning you have done outside of the classroom? You may have knowledge that you have gained through your work history, life experiences, certifications, or training. SAU Tech offers several methods to help you obtain up to 30 college credit hours or half of a degree by converting that knowledge to college credit and applying it to a degree. Earning credit for your prior learning could greatly reduce the time it will take you to finish an associates degree!
Southern Arkansas University Tech
Supply Chain Management
Associate of Applied Science

SAU Tech's Supply Chain Management degree offers the student the fundamentals of supply chain management, including procurement (purchasing), issues in executing local, national, and global supply chains and logistics and transportation. The program also includes business management, economics of supply and demand, and database management skills.

This program is an in-demand program with the manufacturing industries in Arkansas. In the college's local area, the industries have requested that the college provide this training. Due to a U.S. Dept. of Labor grant under TAACCCT round 4, the college was able to secure funding to implement this program. Other contributors include the GenCorp Foundation which is affiliated with Aerojet-Rocketdyne.

SAU Tech can offer certification in this field through the MSSC (Manufacturing Skills Standard Council). Certifications for Logistics Technician and Logistics Associate. These certifications are recognized by industries and provide the student with an advantage when applying for jobs.

Program Courses

- Inventory Control
- Quality Assurance
- Supply Chain Mgt.
- Logistics in Manufacturing

- Composition I
- Operations Management
- Principals of Planning
- Social Science Elective
- Manufacturing Control
- Enterprise Software Mgt.
- Material Handling/Warehousing
- Composition II or Technical Writing
- Social Science Elective
- Enterprise Software Mgt.

How do I get started?

Getting started in college can seem a bit overwhelming but here are a few tips to get the process started right:

1. Locate your high school diploma and any college transcripts (get the college to send them directly to SAU Tech).
2. Locate a copy of your tax returns or your parents' tax returns, if you are their dependent. (you need the returns to apply for financial aid).
3. Go to www.sautech.edu and apply to attend the SAU Tech. It's free to apply!
4. When you complete your application, you will get a letter from SAU Tech's Admissions office that will contain a list of items you need to provide to Admissions in order to be completely enrolled. It will also contain your student ID number, information about MyCollege and your student email.
5. Make sure you get all the documents requested in the letter you received to Admissions.
6. Go to https://fafsa.ed.gov/ and apply for federal financial aid. Do this as soon as you start thinking about attending college. This is where the income tax return comes in handy. If you have problems with this step, please call our Financial Aid office for assistance or just stop by for help. (870.574.4511)
7. Next, you will be assigned an advisor who will help you register for classes, and then the real work begins!

SAU Tech also has student housing if you want to live on campus.
