Southern Arkansas University Tech's Supply Chain Management program is designed to prepare students for entry-level employment in the areas of logistics, materials, acquisitions, and supply management. This program prepares individuals to manage and coordinate all logistical functions in an enterprise, ranging from acquisitions to receiving and handling, through internal allocation of resources to operations units, to the handling and delivery of output. The program includes instruction in acquisitions and purchasing, inventory control, storage and handling, just-in-time manufacturing, logistics planning, shipping and delivery management, transportation, quality control, resource estimation and allocation, and budgeting.

Program Goals

1. The Supply Chain Management program will provide the education and skills necessary for an entry-level position in logistics, materials, acquisitions, and supply management.
2. Prepare individuals to manage and coordinate all logistical functions in an enterprise, ranging from acquisitions to receiving and handling, through internal allocation of resources to operations units, to the handling and delivery of output.

Program Outcomes

1. Students will acquire discipline-specific knowledge in supply chain management.
2. Students will identify supply chain approaches and functions.
3. Students will identify relevant supply chain tools and techniques.
4. Students will effectively communicate verbally and in writing.
5. Students will recognize supply chain problems and define them.
6. Students will synthesize relevant supply chain information.
7. Students will apply supply chain problem-solving approaches.
8. Students will evaluate supply chain solution alternatives.
