From the Foundation Board Chairman,

Today you can choose to join with us in supporting education in our community.

SAU Tech is our two-year college; it belongs to each of us, and each of us can support its efforts knowing that our neighbors, friends, children, grandchildren and others will all benefit in some way.

Since 1968 SAU Tech has been the trainer for employees in this area and a great place for local residents to get started on a new career or begin their educational journey. SAU Tech is a positive force in retaining the industries in the Highland Industrial Park which provide jobs for this area.

As a supporter of the SAU Tech Foundation, you will be supporting students, programs and activities of the college and the future of our community!

Join me today in supporting OUR college!

Sincerely,

Paul Lindsey
Chairman,
SAU Tech Foundation
The Southern Arkansas University Tech Foundation supports SAU Tech and its students by providing scholarships, equipment, employee training funds and more.

Since 2010, the SAU Tech Foundation has awarded over $57,000 in scholarships, provided professional development funds for SAU Tech staff members, helped the college purchase land for a walking trail, purchased training simulators for the college’s industrial programs, and leased housing to the college for use by students. The Foundation also built new student apartments and raised funds to build a housing day room for students.

The possibilities for you are endless as you seek ways to support SAU Tech. The Foundation can create an endowment or scholarship from your gift of cash, bonds, stocks, life insurance, or bequests. The Foundation has several funds that you can donate to if you do not wish to create your own.

Our staff would talk with you about the various ways you can support Southern Arkansas University Tech’s students through gifts to the Foundation. Call (870)574.4560 or contact us by email at dbetts@sauettech.edu.

Sean Kirkendall

Sean is an example of what SAU Tech is all about. Sean, an SAU Tech Computer Information Systems student and PBL member, placed second in the nation in Computer Concepts and third in the nation in Networking Concepts during the PBL National Competition held in Anaheim, California. The competition included over 2,000 students from across the country with Arkansas PBL bringing home around 50 awards.

Sean, a resident of Smackover, Arkansas, graduated from the Arkansas School for the Blind in Little Rock in 2011. Students like Sean are the reason that SAU Tech is so successful. Overcoming personal barriers to excel is not unusual for our students. Your support of the SAU Tech Foundation helps ensure that the college will have the resources it needs to serve students like Sean in the future.
